5-Point Distinct Sentiment Labels

Sentiment Level	Linguistic Indicators (Context)	Example Phrases
Hostile (1)	Profanity, strong verbs of hate, or demands for boycotts/refunds.	"Disaster," "Scam," "Never again."
Negative (2)	Direct criticism of features or performance without extreme vitriol.	"Broken," "Bad quality," "Poor service."
Neutral (3)	Purely descriptive, lacking emotive adjectives or bias.	"The item arrived Tuesday," "It is blue."
Positive (4)	General approval using standard endorsements.	"Great product," "Works well," "Recommended."
Enthusiastic (5)	Superlatives, exclamation marks, and high-energy adjectives.	"Stunning," "Life-changing," "Absolutely perfect!"

7-Level Toxicity & Sentiment Scale

Level	Label	Sentiment	Definition	Example
1	**Predatory / Threat**	Highly Hostile	Explicit intent to cause physical or real-world harm.	"I will find where you live and hurt you."
2	**Hate Speech**	Hostile	Attacking identity (race, religion, gender) rather than ideas.	"People of [Group X] shouldn't be allowed to post here."
3	**Degrading / Insult**	Negative	Targeted personal attacks or vulgarity intended to devalue a person.	"You are an absolute idiot and your opinion is trash."
4	**Antagonistic / Troll**	Negative	Provocative, mocking, or sarcastic comments meant to derail.	"Imagine actually believing this. LOL, stay mad."
5	**Objective / Matter-of-fact**	Neutral	Reporting facts or asking questions without emotional bias.	"The video was posted at 4 PM and has 10 comments."
6	**Constructive / Civil**	Positive	Disagreeing or agreeing politely with clear reasoning.	"I don't agree with your point, but I see why you think that."
7	**Affirmative / Supportive**	Enthusiastic	High-energy validation or community-building language.	"This is such a brave post, thank you for sharing this!"

How to Differentiate the " Toxicity Label"

To ensure a comment fits into **only one** category, follow this hierarchy of "Worst First":

1. **Threat vs. Hate:** If a comment contains both a slur and a threat, label it **Threat**. Safety takes precedence over identity-based labeling.
2. **Hate vs. Insult:** If someone calls a person a name based on their *intelligence*, it is an **Insult**. If they call them a name based on their *race/gender*, it is **Hate Speech**.
3. **Troll vs. Constructive:** Look for the **intent to help**. If the user points out a flaw to fix it, it's **Constructive**. If they point out a flaw just to mock the person, it's **Troll**.
4. **Neutral vs. Positive:** If the text provides information but uses one "praise" word (e.g., "This is a *good* factual report"), move it from **Neutral** to **Constructive**.

Content Themes:

1. **Election & Voting**

Anything related to the act of voting, the Election Commission, or the struggle for power.

- **Keywords:** *Vote, Center, Caretaker, ECI, Results, Rigging.*

2. Party & Leadership

Focuses strictly on political parties (AL, BNP, etc.) and their leaders. If the post is about "My party is better" or "Their leader is bad," it goes here.

- **Keywords:** *Hasina, Khaleda, Tareq, Mujib, Zia, Activists, Party meeting.*

3. Price Hike & Economy

Focuses on the "Pocketbook" issues that common people post about most often.

- **Keywords:** *Bazar, Inffation, Syndicate, Oil/Gas prices, Bank, Dollar.*

4. Law & Order

Covers police actions, court cases, arrests, and protests. This is very common in BD social media.

- **Keywords:** *Police, Arrest, Jail, Court, Case, Protest, Strike (Hortal).*

5. Religion & Identity

Posts where politics meets faith. This is a very distinct category in Bangladesh and easy for a model to "see" via specific religious terminology.

- **Keywords:** *Islam, Secular, Minority, Madrasah, Statues, Faith.*

6. Foreign Influence

Specifically for posts about India, USA, or China’s role in Bangladesh's internal politics.

- **Keywords:** *India, Delhi, USA, Sanctions, Visa Policy, Border.*

7. National Projects & Progress

Focuses on "Development Politics" (Unnayan)—infrastructure, digital Bangladesh, or mega-projects.

- **Keywords:** *Bridge, Metro Rail, Highway, Development, Digital, Success.*
